

## Industrial or Commercial Natural Gas Connection and Meter Installation

### IMPORTANT INFORMATION, PLEASE KEEP IN A SAFE PLACE

Dear Sir or Madam

We have recently processed an application for a new natural gas connection to a commercial property located at:

**Apartment Complex**  
**168 Prospect Rd, Prospect, SA, 5082**

The connection of natural gas to your property involves the following process:

- 1. Installation of the Gas Inlet Connection (Inlet or Delivery Point)**
  - An APA Group contractor will complete the inlet connection in due course.
- 2. Installation of the Gas Meter (Meter Fix)**

A gas meter can be fitted when:

  - The inlet connection (Delivery Point) has been completed by APA.
  - The outlet pipework has been completed by your licensed gasfitter.

When the above requirements are completed, you will need to arrange a gas account and meter fix with a gas energy retailer. The following gas retailers are able to provide this service:

AGL	Ph. 1800 680 430
Origin Energy	Ph. 1300 132 480
Energy Australia	Ph. 1800 818 378

**Your gasfitter can advise you of when your meter installation is ready to be scheduled.**

The following **Meter Installation Registration Number (MIRN)** has been allocated to your property, and all the below details will be requested by your gas retailer when you arrange your account and meter fix.

MIRN	Meter Type	Gas Load	Outlet Pressure
<b>5510 242 019</b>	<b>Commercial</b>	<b>1200Mj/Hr</b>	<b>2.75kPa</b>

Once the gas retailer has processed the meter fix request and established an account, they will inform APA.

APA will then contact you to confirm the meter installation date. You will need to send APA a Gas Certificate of Compliance (COC) before the meter can be installed. Please email the COC to [ian.carr@apa.com.au](mailto:ian.carr@apa.com.au)

If you have any further queries, please contact your gas retailer or myself as below.
