

## Technical Data Besam Seeline

### Roll Diameter for Seeline

Opening Height	1000mm	2000mm	3000mm
Headroom	560mm	575mm	590mm

### Side Clearances

Hand Operated	50mm minimum
Motorised Tubular	50mm minimum

### Specification

Supply and fit Besam Seeline polycarbonate roller shutter manufactured by ASSA ABLOY. The curtain shall be alternate slats of 30mm high aluminium and 100mm high polycarbonate secured with a nylon endclip on every aluminium slat.

### Operation

Hand operation or 240v tubular motorised operation with key switch control is also available. Motorised units can also be provided with a battery back-up as an optional extra.

### Features

The SEELINE Polycarbonate Roller Shutter is designed for security with clear vision through the shutter, allowing natural light flow and protection against debris and vermin.

- Opening size up to 3500mm high
- x 3500mm wide on internal applications Larger Sizes on request
- A weatherseal is available as an option to the bottom rail.
- Available in anodised or powdercoat finishes.

### Roller Drum

Manufactured from spiral ducted tube to achieve minimum deflection. The steel tubular shaft is supported by steel drum wheels with self-lubricating bearings and houses the helical torsion springs which counterbalance the curtain weight for a smooth and easy operation.

### Locking

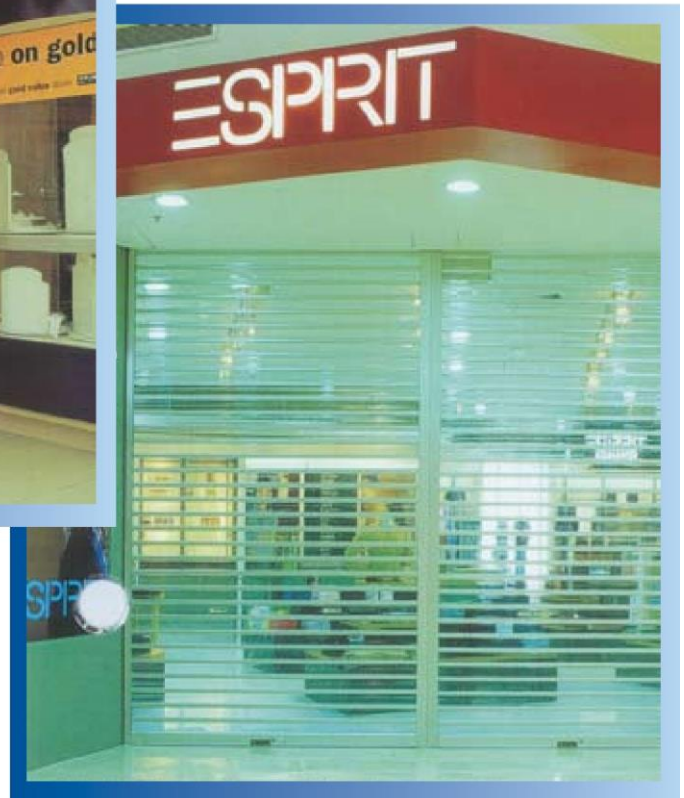

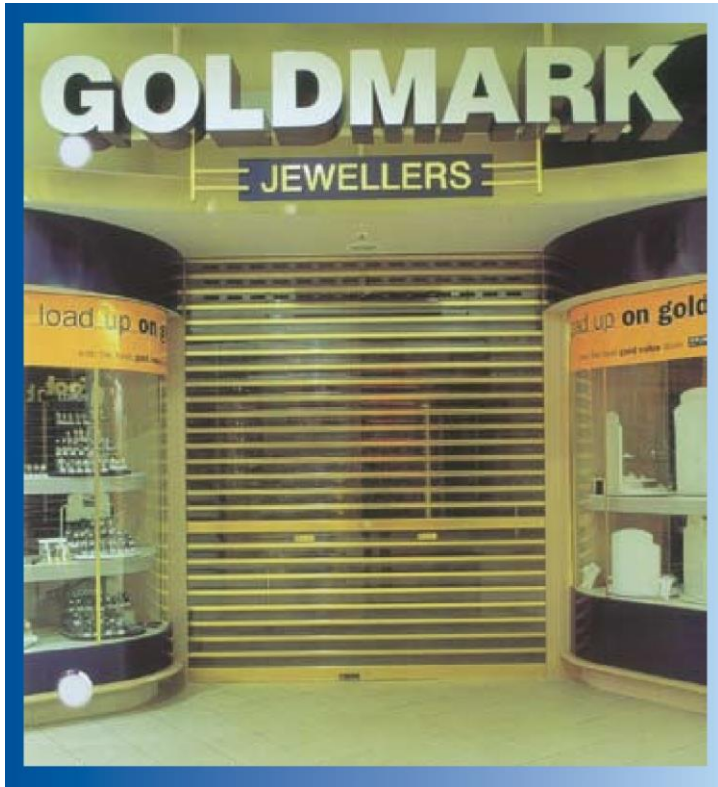

A two-way mortice lock is mounted centrally within the bottom rail. Optional waist-high locking and Master Keying are also available.

**Note:** If inadequate access is provided ASSA ABLOY will not be responsible for maintenance, nor the costs incurred to create adequate access. The structural supports for brackets and guide are to be provided by others. ASSA ABLOY has a continuous programme of product development and reserves the right to change these specifications at any time without notice.
